SELECTED QA PROJECTS

Playwright QA Automation — SauceDemo **View repository**

- Automated UI checks for core journeys including login, product sorting, cart actions, and validation.
- Organized tests with Playwright and TypeScript; repository records 30 passing tests across Chromium, Firefox, and WebKit.

API Testing Practice — Postman **View repository**

- Built practice collections using JSONPlaceholder to exercise HTTP methods, response assertions, variables, and collection runs.
- Documented test cases and sample validation observations; treated these as practice-environment findings, not production defects.

Manual QA & Bug Reporting **View repository**

- Practiced reproducible bug reports with steps, expected versus actual results, and supporting evidence.
- Used Jira/GitHub-style workflows to organize observations, retesting, and documentation.

EXPERIENCE

Customer Support Representative — Lompard 2025–Present

- Respond to customer enquiries, communicate information clearly, and help resolve service issues.
- Use customer-facing communication and follow-up to support a consistent service experience.

Customer Support & Marketing Executive — X8C 2021–2022

- Supported customer communication and marketing activities, responding to customer needs and helping maintain engagement.

Freelance QA Tester — Test IO Jul 2020–Nov 2021

- Participated in crowdtesting, exploring web and app experiences and reporting issues through structured testing workflows.

Domain Sales & Customer Relations — Self-employed 2020–2024

- Managed domain research, sales conversations, customer follow-up, and portfolio administration through marketplaces including DAN and Afternic.
- Generated more than $40,000 in domain sales; this figure represents sales, not profit.

EDUCATION & CERTIFICATIONS
